Zoovet ELECTROLYTE

For zoo and exotic animals

Zoovet ELECTROLYTE is a water soluble electrolyte powder with enzymes, vitamins and minerals specially designed for oral rehydration in zoo animals and exotic species. It is highly palatable, allowing easy administration in the drinking water or by tube.

Zoovet ELECTROLYTE is a valuable aid in hospital and quarantine situations, as well as a support prior to, during and following animal transports and during periods of stress and veterinary treatment. Beneficial soluble vitamins, minerals and amino acids aid supportive care, and the enzymatic action improves digestion and release of nutrients for absorption.

Contains: Sodium Chloride, Potassium Chloride, Magnesium Sulphate, Trisodium Citrate Dihydrate, Dextrose, Pantothenic Acid, Folic Acid, Niacin, Biotin, Vitamin A, Vitamin D3, Vitamin E, Vitamin C, Vitamin B1, Vitamin B2, Vitamin B6, Vitamin B12, Vitamin K, Amylase, Protease, Cellulase, Amino Acids.

Zoovet ELECTROLYTE is available to purchase as a white, speckled powder in tubs of 500g or 1.5kg. Each tub is supplied with measuring scoops allowing exactly the required amount to be reconstituted thus avoiding waste.

Dosage: Reconstitute **Zoovet ELECTROLYTE** by mixing with fresh drinking water at the following rate:

Measure size (level measure)	Volume of water for Zoovet ELECTROLYTE solution
2.5ml	100ml
5.0ml	200ml
10ml	400ml
20ml	800ml

Handling and Storage: Take care to use level measures to obtain the optimal solution. Prepare a fresh solution every 24 hours. Stir thoroughly before use. For feeding use only. Do not dip wet utensils into pack. Do not inhale. Wash hands after use. Store in a cool, dry place (below 25°C) away from direct heat and sunlight. Not for human consumption. Keep out of reach of children.
