# Zoovet HERBIVORE AQUATIC GEL

## For aquatic herbivores

**Zoovet HERBIVORE AQUATIC GEL** is formulated to be fed as a complete diet to herbivorous aquarium fish, and is suitable for algal grazers such as plecs, pacu and tangs. It can be supplemented with natural foods if required. It contains appropriate levels of carbohydrate and fibre plus all the vitamins and minerals required by plant-eating fish. In addition, the gel contains pigmenting agents which help to maintain fish appearance. It is also an ideal vehicle for the administration of oral medication to fish.

The diet is presented as a dry powder. When made up as a gel, **Zoovet HERBIVORE AQUATIC GEL** can be delivered in many forms—as a single mass, crumbled, chopped or grated into small pieces,, or pressed into crevices, to provide feeding enrichment and activity. When properly mixed and fed in appropriate quantities, the gel will not cloud the water or overload life support systems. When made up the fresh mixed diet can be kept for 3 days at 4°C or frozen for 6 months at -20°C.

Mix the powder thoroughly with water at room temperature to produce the consistency required. As a guide, 20% water to 80% powder (by volume) will produce a thick paste. Pour into a flat, cool tray and allow to set in a cool room or refrigerator. Cut the gel to a size suitable for the animals being fed. If mixed with more water, a less dense paste can be formed, which can be applied to rock work or the aquarium side to encourage grazing behaviour. Feed 1–2 times per day on as much as the fish will eat within 5 minutes and once per day for sea turtles. If food remains uneaten, remove from the aquarium and reduce the quantity fed at the next meal.

**Handling and Storage:** Wash hands after use. Store in a cool, dry place (below 25°C) away from direct heat and sunlight. Not for human consumption. Keep out of reach of children.

## Composition:

Spirulina, Seaweed (Kelp), Insect Meal, Wheat Gluten, Brewer’s Yeast, Mycoprotein, Lucerne, Xanthan Gum, Garlic, Chlorella.

## Analytical Constituents:

Moisture 6.0%, Crude Fibre 2.60%, Crude Ash 7.0%, Crude Oils and Fats 1.70%, Crude Protein 42.0%.

## Energy:

2,200Kcal/kg

## Product Specification per kg:

Vitamin A	24,580IU
Vitamin D3	1,400IU
Vitamin E	98mg
Copper (Cu)	4mg
Vitamin C	422mg
L-lysine	480mg
DL-methionine	480mg
Betain	1,920mg
Beta-glucane	480mg
Iron (Fe)	82mg
Iodine	0.60mg
Manganese	16mg
Zinc	22mg
L-carnitin	48mg
Calcium	0.15%
Phosphorus	0.15%

**Zoovet HERBIVORE AQUATIC GEL** is manufactured to pharmaceutical standards on behalf of IZVG LLP and is available to purchase in 1kg bags.
