Zoovet HERBIVORE CALCIUM

MINERAL SUPPLEMENT

For herbivorous animals

Zoovet HERBIVORE CALCIUM is a mineral supplement formulated to provide the optimum calcium/phosphorus ratio of 1.8:1 for all herbivorous animals, particularly reptiles. Fed regularly as part of a properly formulated diet, **Zoovet HERBIVORE CALCIUM** will ensure that the correct mineral balance is achieved where a complete natural diet cannot be provided. Correct levels of calcium and phosphorus in the diet are vital for bone and tooth development, blood clotting, nerve and muscle function and energy utilisation. Deficiencies or an incorrect balance of these minerals may cause serious disease or skeletal deformities.

Zoovet HERBIVORE CALCIUM contains Dicalcium Phosphate and Calcium Carbonate.

Dosage: Our recommendations for the daily dose of **Zoovet HERBIVORE CALCIUM** to be added to a vegetarian diet are as follows:

One 1ml scoop per 4kg bodyweight daily
One 2.5ml scoop per 10kg bodyweight daily
One 5ml scoop per 20kg bodyweight daily
One 10ml scoop per 40kg bodyweight daily

1g **Zoovet HERBIVORE CALCIUM** per 4kg bodyweight per day.

Zoovet HERBIVORE CALCIUM is available to purchase as an off-white powder, packed in tubs of 500g or 1.5kg. Each tub is supplied with measuring scoops allowing exactly the required amount to be reconstituted thus avoiding waste.

Handling and Storage: Wash hands after use. Store in a cool, dry place (below 25°C) away from direct heat and sunlight. Not for human consumption. Keep out of reach of children.
